VARUN ANKANAHALLI

Quality Assurance Intern | Manual & Automated Testing | API Testing | Detail-Oriented

8983694082 • v66581770@gmail.com • linkedin.com/in/varun-ankanahalli • Bengaluru, India

Summary

Detail-oriented professional with hands-on experience in deep learning and computer vision, expert in Python and full-stack development. My key achievements include winning multiple hackathons by building innovative healthcare solutions, such as a deep learning pipeline for medical imaging that achieved 89% accuracy and a secure medical records management system. Seeking a Quality Assurance (QA) / Web Application Testing Intern position at Axinq Technologies, where I bring my analytical skills and rigorous testing methods to support your mission of delivering high-quality web applications.

Key Achievements

Deep Learning Model Accuracy

Achieved 89% model accuracy in diagnostic summaries generation using InceptionV3 and others.

Hackathon Award Recognition

Secured ₱15,000 cash award at Anveshana National Level Hackathon for innovative healthcare solution.

High Throughput Implementation

Achieved 0.92 incident recall@5 and 1.8k events/sec throughput in operational memory system.

Experience

Anveshana

Bangalore, India

Radiologist Assisting System Deep Learning Computer Vision Medical Imaging

2026

- Hackathon Winner
- Implemented built a deep learning pipeline to analyze X-rays, CT scans & MRI images, generating structured diagnostic summaries using InceptionV3, ResNetV2, and VGG16, realizing 89% accuracy and 86% validation score
- Recognized at Anveshana - BMSIT National Level Prototype Hackathon with Consolation Prize and *15,000 cash award
- Built an IoT healthcare prototype integrating DHT11 temperature, moisture, and pH sensors for real-time wound monitoring and infection detection; served as Full Stack Developer end-to-end
- Developed a secure medical records management system allowing patients to store and share health history with providers via a simplified, transaction-inspired sharing mechanism

Anvil

Bangalore, India

Persistent Context Engine | Distributed Systems · Operational Memory |

2026

- National Hackathon Winner
- Engineered a high-scale operational memory substrate (Python 3.10+) that synthesizes evolving contextual relationships from telemetry to help engineers resolve incidents.
- Architected a probabilistic causal graph with Bayesian confidence scoring, incident family registry with fuzzy fingerprinting, and multi-tiered memory models using Welford's algorithm.
- Achieved 0.92 incident recall@5, 0.88 causal accuracy, 1.4s p95 latency, and 1.8k events/sec throughput.
- Won 4th position + ₱3,000 prize at Scalar School of Technology National Level Hackathon.

Education

CMR Institute of Technology

Bengaluru, India

B.E. Computer Science (Data Science)

08/2024 - 05/2028

Skills

Python · JavaScript · C · C++ · Flask · FastAPI · Deep Learning · Computer Vision · InceptionV3 · ResNetV2 · VGG16 · Git · GitHub · Claude Code · MongoDB · Excel · Power BI · REST · Postman · Curl · Automated Testing

Projects

Radiologist Assisting System | Deep Learning · Computer Vision · Medical Imaging

Present

- Built a deep learning pipeline to analyze X-rays, CT scans & MRI images, generating structured diagnostic summaries using InceptionV3, ResNetV2, and VGG16 — achieving 89% accuracy and 86% validation score.
- Recognized at Anveshana – BMSIT National Level Prototype Hackathon with Consolation Prize and ₱15,000 cash award.

Smart Bandage | IoT · Full Stack · Sensor Integration

Present

- Built an IoT healthcare prototype integrating DHT11 temperature, moisture, and pH sensors for real-time wound monitoring and infection detection; served as Full Stack Developer end-to-end.

MediVault | Flask · MongoDB · Data Security

Present

- Developed a secure medical records management system allowing patients to store and share health history with providers via a simplified, transaction-inspired sharing mechanism.
